

## **Satellite Meeting “Aging and the immune system”**

**August 20-22, 2013**

organized in conjunction with the 15<sup>th</sup> International Congress of Immunology  
(Milan, Italy, August 23-27, 2013)

### **Scope of the Meeting**

The major goal of the meeting is to view and discuss recent advances in research on the immunology of aging, addressing the most important research areas such as innate, adaptive and clinical immunology. The Meeting aims to provide a basis for constructive discussions on recent achievements in the field and for close interactions between colleagues and trainees which will lead to future collaborations.

The Satellite Meeting will cover various currently important topics on the aging immune system to include e.g. the following:

1. Stem cells
2. Inflammation
3. Thymic involution
4. Accelerated aging in HIV
5. Aging and vaccine responses
6. Aged (centenarian) populations
7. Microbiome with age
8. Major affected cell types including T, B, DC, innate and adaptive systems
9. Immunological interventions

The Satellite Meeting will plan to have a poster session as well as speakers and keynote speakers.

### **Meeting Venue**

MiCo - Milano Congressi, Milan, Italy

**Registration and Abstract Submission Deadline** is June 1<sup>st</sup>, 2013

### **Scientific organizers**

Bonnie B Blomberg, USA; John C Cambier, USA; Daniela Frasca, USA; Rebecca Fuldner, USA; Arne Akbar, UK; Beatrix Grubeck-Loebenstein, AT; Graham Pawelec, DE; Rafael Solana, ES
